And some initiatives that did not make the list

Mobile Access by Axis
Wireless Access Points

Bluetooth Access Point:
Going Beyond Cables

The *Bluetooth* Access Point belongs to a family of products from Axis Communications, a leader in network connectivity. It is based on Axis' ThinServer Technology, which enables devices to be connected to any computer network seamlessly and cost-effectively. The cornerstone of this technology is the AXIS ETRAX system-on-a-chip, which is optimized for Internet applications and features embedded Linux.

Networking Cameras

Axis has a complete range of network cameras for security

Fixed cameras

Thermal cameras

Encoders/ decoders

Fixed dome cameras

Covert cameras

Software & recording

PTZ cameras

Accessories

Physical access control

AXIS
COMMUNICATIONS

Benefits of network video

Open platforms with easy integration

Scalable and flexible system architecture

Leverage existing IT infrastructure

Exceptional image quality (HDTV)

Continuous innovation

AXIS®
COMMUNICATIONS

Open Consistent Interfaces – A Corner Stone of Axis Success

> Always backwards compatible

> All official APIs available on our website

> All functionality in our products can be controlled using our HTTP API

  – Powerful and flexible interface having a single and standardized API for all of our products

  – Easy for third party developers to integrate our products in their applications

> In 2008 we started ONVIF together with Sony and Bosch to set an industry standard

AXIS
COMMUNICATIONS

AXIS A1001 Network Door Controller

Open and flexible, powered by IP

> A smart independent device that is installed by each door

> A non-proprietary platform for access management

> Two different solutions for small & advanced enterprise systems

Physical access control the Axis way

> AXIS A1001 available through a wide network of partners

  – Open API available to any company

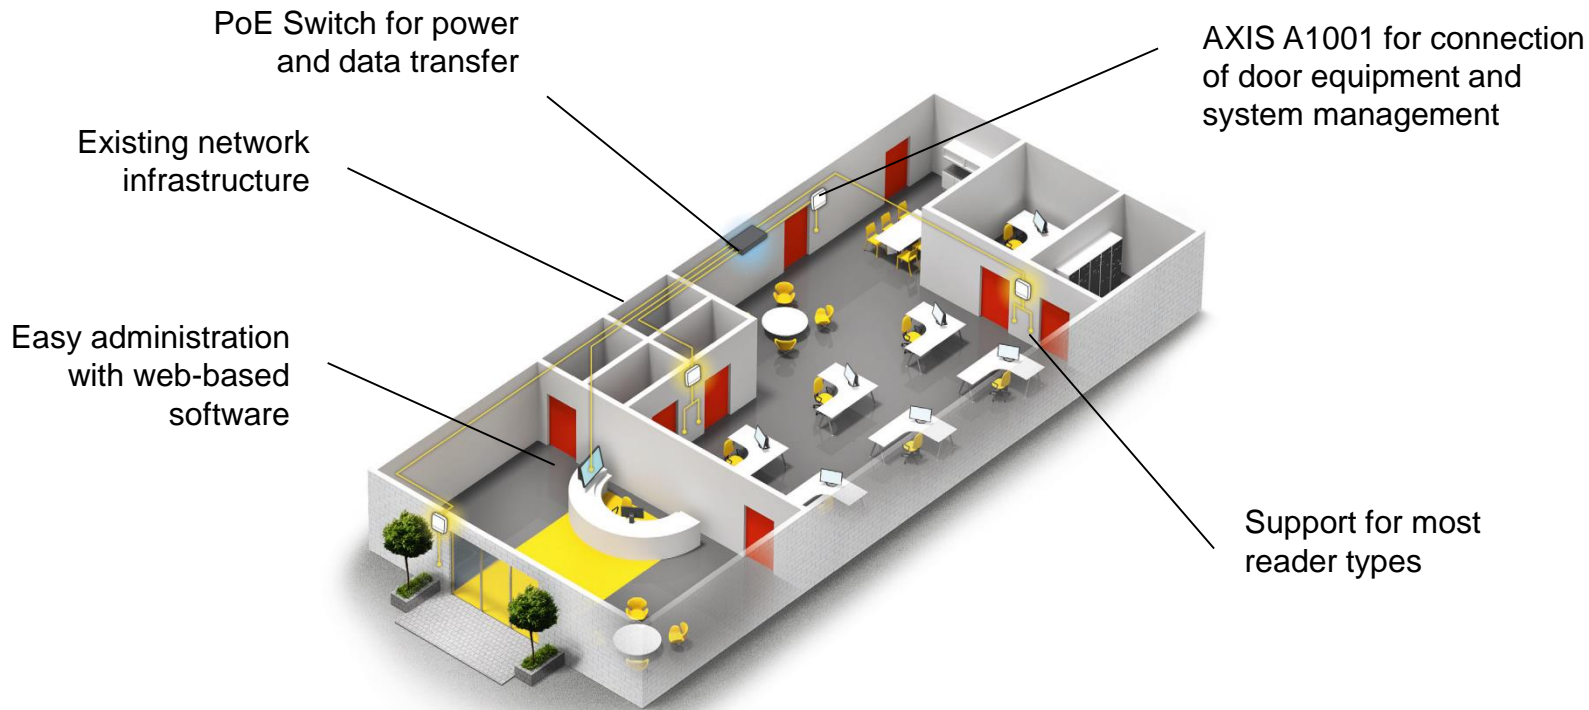

> Easy to integrate with other systems

  – Video surveillance

  – Intrusion detection

  – HVAC

  – HR management

Networking creating an open & flexible solution

PoE Switch for power and data transfer

AXIS A1001 for connection of door equipment and system management

Existing network infrastructure

Easy administration with web-based software

Support for most reader types

Many more things to connect…
