

## Press information

# 3,2,1, the winners of the IOT / M2M Innovation World Cup are...

The world's most innovative solutions in the Internet of Things were crowned during Mobile World Congress in Barcelona.

**Barcelona, 24 February** It was an incredible display of innovation once again at the WT | Wearable Technologies Conference SPAIN in Barcelona. Selected out of almost 400 submissions from across the globe, 25 finalists of the IOT / M2M Innovation World Cup took the stage to present their groundbreaking solutions in the live and exciting elevator pitch session. Ultimately, the champions of the IOT / M2M Innovation World Cup were chosen from each of the five categories – “Connected Home”, “Smart City”, “Mobility”, “Security”, and “Healthcare”.

The following 25 IOT Heroes were nominated by the jury to become one of the five winners (in alphabetical order): BBDL Ltd. (Hong Kong), BizFact (Hungary), BlueMind (France), EISOX (France), EllieGrid (USA), Ether2 (USA), EverCharge (USA), FILLONY Ltd. (Hong Kong), Greenbird Integration Technology (Norway), Inboard Technology (USA), IoT Smart Systems (Canada), iSocket Systems (Finland), Kizy Tracking (Switzerland), Lumind (Germany), Microtronics Engineering (Austria), MYXYTY (France), PAYUCA (Austria), PixController (USA), Qanticare Technologies (Australia), Qylur (USA), SADE.IO (Turkey), Sensing & Control Systems (Spain), SEP Solutions (Finland), Swissprime Technologies (Switzerland), and Teslonix (Canada).

And here are the five winners of the IOT / M2M Innovation World Cup 2015/16:

The champion in *Connected Home* is **MYXYPOD by MYXYTY** (France):

MyxyPod is an all-in-one solution integrating the widest range of sensors available on the market. With hundreds of accessories already supported, the multiprotocol sound speaker allows users to manage their home security and safety, their energy consumption, health monitoring, comfort at home, multimedia and lighting atmosphere.

The champion in *Smart City* is **Smart EV Charging Station by EverCharge** (USA):

The Smart EV Charging Stations are able to increase the capacity for chargers up to 10 times at any given building. Provided to urban multi-tenant facilities, the SmartPower technology senses when extra power is available or when the rated capacity is reached, the system allocates power to vehicles according to their needs, maximizing building infrastructure usage while reducing deployment costs.

The champion in *Mobility* is **Kizy by Kizy Tracking** (Switzerland):

Kizy is a low-cost B2B tracking system especially designed to fulfill the actual needs of the logistics industry, Kizy uses the GSM-infrastructure (no GPS) for positioning and communication. Kizy makes advanced tracking and monitoring functionalities - which were up until now limited to niche applications – affordable for large scale deployments.

The champion in *Security* is **My Lock by Swissprime Technologies** (Switzerland):

My Lock is a comprehensive locking solution for innumerable applications, which allows its users to share and revoke lock keys over the air by simply making use of their smartphones. The lock is getting online by means of the smartphone and is therefore capable to transmit and track all locking activities over the cloud application. Due to the flexibility of the platform, My Lock is compatible with all locks supporting the technology, thus allowing to conveniently unlock every user's world.

The champion in *Healthcare* is **The Footprints Walking Frame by Quanticare Technologies** (Australia):

The Footprints walking frame features a sensor which measures walking quality to prevent falls in the elderly. Sensor will measure the same clinometric properties of gait that clinicians use today to understand falls risk but do so: continuously, passively and contextually so that treatment can be delivered before a fall happens, interventions can be optimized and their efficacy measured.

Gerhard Schedler, Head of Sales Mobile Services & M2M/IoT of SWISSCOM, and title sponsor from the very beginning states, “Over the past 4 years we have witnessed considerable growth in the area of M2M and the Internet of Things. The bandwidth of solutions across sectors have increased exponentially, and the business impact generated has outperformed most of the forecasts. At Swisscom we celebrate the innovation and entrepreneurship of those helping shape the future of the Internet of Things and are proud to contribute a small part to the success of our 25 IOT Heroes 2016 and their breakthrough solutions.”

The 5 champions and their winning solutions are now inducted into the official Hall of Fame of the IOT / M2M Innovation World Cup.

## About the IOT / M2M Innovation World Cup

The IOT / M2M Innovation World Cup is the leading IOT / M2M award worldwide. Hundreds of contestants from 70 countries demonstrate the huge innovation potential in the world of machine-to-machine communication and the Internet of Things. The leading global innovation competition is welcoming revolutionary IoT / M2M solutions in the categories of “Smart City”, “Mobility”, “Security”, “Healthcare” and “Connected Home”. An international panel of industry experts selects the most innovative products according to criteria such as level of innovation, marketability, and usability. Participation is free of charge. For further information, please visit [www.innovationworldcup.com/iot-m2m/](http://www.innovationworldcup.com/iot-m2m/).

The IOT / M2M Innovation World Cup is sponsored by Swisscom as title sponsor, as well as Telit Wireless Solutions, MediaTek Labs, VARTA Microbattery, and Gemalto. Further partners include MEDICA, WT Wearable Technologies AG, Kickstarter, IoT Global Network, m2m forum, Engerati, M2M World News, Plug and Play Tech Center, Paris Region Entreprises, Business Oulu, Takomo, TAITRA, Team Cote D’Azur, Comm4Innov, Innovative City, CSEM, AlpICT, m2m alliance, IT2Industry, ICT Cluster Bern, Medical Valley, Mobile Monday, Government of Canada, Disruptive Week Milan, Cluster Digital, and many more.
